*Emotionally intelligent leaders bring out the best in others. There is a sense of “flow” in their thinking, behavior, and habits. The one quality that makes them shine is their genuine sincerity. They balance AI with EI. They leave others in an increase. Businesses led by leaders high in EQ, treat employees with dignity, authenticity, and transparency. Emotionally intelligent leaders know how to say “no.” Emotionally intelligent workplaces create happier, less-stressful work environments.*
